

AUTUMN - 2009

OPEN AND SHUT CASE FOR NEW RANGE OF SECURE STORAGE UNITS

James Bedford & Co Ltd, one of the UK's leading suppliers of industrial equipment, has launched 'Optima' a multi-purpose secure drawer unit system.

The modern looking, quality units come with central locking and are manufactured to a high specification in a mid Grey carcass. The drawers are fitted with aluminium handle fronts and are available in a choice of colours, heights and widths.

Customers also have the option of cabinets fitted with drawer subdivisions and can choose from three worktop options. Custom made units are also available to order.

Ideal for storing high value items such as tools used in the automotive industry including car manufacturers and motor racing teams, Optima is also ideal for use in a myriad of other sectors including aerospace, precision engineering, electronics, education, medical and museums.

"We pride ourselves on listening to our customers' requirements and through enquiries received we recognised there was a niche in the market for quality, precision engineered heavy drawer units," explained James Bedford's marketing manager, Neil Emmott. He added: "The initial feedback on the Optima range has been very encouraging.

BEDFORD'S SET TO 'SHOWCASE' HAZARDOUS CABINETS AT HEALTH & SAFETY EXHIBITION

One of the UK's leading suppliers of industrial equipment, James Bedford & Co Ltd will be exhibiting at this year's Northern Health & Safety Exhibition (Stand 38) being held at the Bolton Reebok stadium on the 6th and 7th October.

The company, which is based in Birstall near Leeds and celebrated 35 years of successful trading earlier this year, has become synonymous with its high quality workbenches, trolleys and cabinets.

James Bedford's marketing manager, Neil Emmott said: "At the exhibition we will be displaying our range of Yellow Hazardous cabinets which are designed to store flammable liquids safely. During the run up to Health & Safety assessment customers often need swift delivery of these items and to meet this demand we keep our best selling, competitively priced cabinets in stock, which enables customers to take delivery within three to five days.

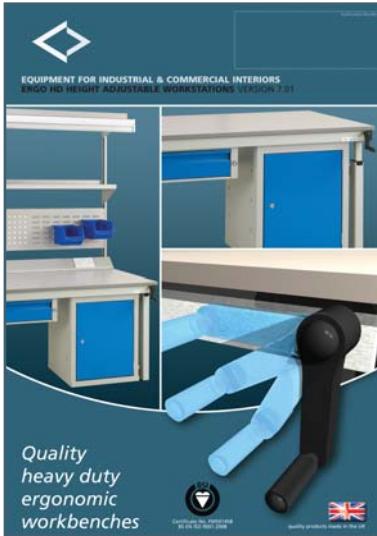

He added: "We will also be using the exhibition to actively recruit distributors for our products."

James Bedford's impressive range of hazardous cabinets (which comply with UK regulations) also include a comprehensive range of safety cupboards for storing acids, pesticides and toxic substances. The company also supplies PPE and First Aid cabinets.

WORKSTATION SET TO REACH NEW HEIGHTS OF CUSTOMER SATISFACTION

James Bedford & Co Ltd, one of the UK's leading suppliers of industrial equipment, has launched a new range of height adjustable ergonomic workbenches (Ergo) which satisfy the requirements of the Disability Discrimination Act (DDA) 1995.

'Ergo' is the latest in a long line of product development from James Bedford and complements the company's comprehensive choice of workbenches and storage cabinets.

The unique height adjustable workstations are supplied complete with a 400-kilo uniform distribution load (UDL) capacity on a 4-leg unit with a 4x gear system and a 300mm smooth height adjustment via a simple crank handle system.

Suitable for all heights, and the disabled, the 'Ergo' provides ample leg room, is user friendly and ideally suited

for most work environments including engineering, education, packaging, electronics, aerospace, assembly, laboratories and research units.

The quality, heavy duty workstations have been designed to help prevent repetitive strain injuries, which can develop over time and can lead to long-term disability.

LEADING WORKBENCH MANUFACTURER COMPLETES PRESTIGIOUS CONTRACT

James Bedford & Co Ltd has successfully completed a prestigious contract which included supplying hundreds of workbenches for a new £12m manufacturing facility of a major UK company in the oil and gas industry.

Located in Birstall near Leeds, James Bedford celebrated 35 years of successful trading earlier this year and is now one of the UK's leading suppliers of industrial equipment employing 35 people with a current turnover of £3m.

Over the years, the firm has become synonymous with its high quality workbenches, trolleys and cabinets. This reputation helped the company to successfully tender for the contract with leading oilfield service company Expro to supply workbenches along with lockers, cupboards and furniture for a 'clean room' in its new Subsea Excellence Centre in Ulverston, Cumbria.

James Bedford's marketing manager, Neil Emmott said: "We were delighted to win this contract against strong competition and rose to the challenge of supplying the workbenches and other products, which were all designed in conjunction with the Expro Connectors & Measurements team, for their new 'state of the art' facility."

For further information on James Bedford's products please contact a member of the Sales Team on 01924 442 048, email sales@jbedford.co.uk or visit www.jbedford.co.uk.

Expro's business is well flow management, providing oil and gas companies with services and products that measure, improve, control and process flow from high-value oil and gas wells. Expro employs 5,000 people in 50 countries. Expro's Tronic subsea connection systems, designed and manufactured in Ulverston, are key to enabling the extraction of valuable oil and gas reserves in deepwater environments around the world.
